

Better Building Blocks
Speaker Application

Better Building Blocks is a Historic Richmond Initiative launched in partnership with the Department of Historic Resources to increase awareness among middle school students of the wide variety of career paths available to them within the fields of preservation and historic trades. We will be acting as a connection point for various organizations hosting youth programming, including the Henrico and Richmond Public Library Systems. Demographic information is requested to match student bodies with speakers of similar backgrounds, allowing them to better see themselves in these various roles.

Name: _____

Occupation/Profession: _____

Employer: _____

Please provide a short description of your role: _____

Please indicate which Standards of Learning subjects do you find relevant in your profession (you may select more than one):
